

# Making Faces

- Choose one of the faces above.
- Can you make a model of a face that portrays the same emotions?

NB: Use separate pieces of playdough for the facial features

## Your Challenge:

**Pair up – one partner takes charge of modelling with the playdough and the other is responsible for giving the instructions (the programmer)**

Programmers, using only verbal instructions get your partner to create one of the faces above.  
How good are your instructions? Can you complete this in under a minute?
