	If students are struggling to think of a logo teachers may like to encourage their students to research professional team logos via the internet.	DSH-worksheet-pack-just-dance-tournament – page 1  Pens  Coloured pens, pencils or crayons
<b>5</b>	Task 2 – Explain that your students are about to watch a video showing some people commentating on a Just Dance tournament. Explain that commentating in esports is called shoutcasting. Tell your students that they should make notes on their task 2 worksheet about what kinds of things the shoutcasters are talking about to give them ideas for what they could talk about in their own commentary. <b>6</b>	Task 2 – Students should take notes as they watch the video.  Video embedded into slide or YouTube link in notes can be used.	DSH-presentation-just-dance-tournament – slide 6  DSH-worksheet-pack-just-dance-tournament – page 2  Pens
<b>7</b>	Task 3 – Explain to your students that another job role in an esports tournament is the host. Tell them that the host is responsible for telling the audience who is about to play and for introducing the tournament.	DSH-presentation-just-dance-tournament – slide 7

	Tell your students to fill in the table on the left of their worksheet to give them the information they will need to know about the tournament if they were the host and then use this information to write a script that could be used to introduce the tournament on the right. You might like to run this as a competition with the writer of the winning script acting as the host for your tournament.	DSH-worksheet-pack-just-dance-tournament-page 3  Pens
8	Show your students the final slide and explain that these are the rules for the tournament.	DSH-presentation-just-dance-tournament - slide 8

Prior to running the tournament, ask your students to sign up their team and then randomly arrange the brackets using their team names. There are lots of online bracket generators that will do this for you e.g., [https://challonge.com/tournament/bracket\\_generator](https://challonge.com/tournament/bracket_generator)
